KASH PATEL

Junior Full Stack Web Developer

Date : 12 Oct 2021

TO :

The Hiring Manager

_____

_____

APPLICATION :

Role: Junior Web Developer
Company :_____

Dear Sir/Madam,

Thank you for taking the time to review my application for the role of Junior Web Developer.

Building beautiful responsive websites and applications has always been truly a passion of mine.

I have been taking online courses in Python, HTML, CSS, JavaScript, and React with **Codecademy** and **Scrimba** to develop the technical skills required to become a web developer.

Recently, I have also been taking a **25-weeks intensive Full Stack Web Development Bootcamp** with University of Sydney which I committed a minimum of 20 hours per week throughout the whole course. This Bootcamp has shaped my skills in HTML, CSS, Bootstrap, JavaScript, APIs, NodeJS, Git, GitHub as well as collaboration and teamwork.

In addition to my technical skills, my previous experience working as a Digital Sales Representative as well as a coding instructor has helped me build a very strong ability in analytics, troubleshoot, problem-solving, researching, communication, multi-tasking as well as applying creativity and presentation skills.

I am very hard-working and very keen to become a full stack web developer. If given the opportunity for this position, I will bring my passion, drive, and work ethic to be a great asset to the company.

My attached resume will provide more detail on my skills and experience.

I look forward to your positive response.

Sincerely,

KASH PATEL

Exceptionally creative and dependable Entry Level Web Developer with a unique blend of skills in web development, digital sales and customer service. Highly dedicated, self-motivated professional with robust problem solving as well as a strong ability to communicate and work effectively in a team looking for a long-term position as a web developer.
